Acurve
THE DANCE OF STONE

an invitation to transcend ordinary design

The Acurve Interlocking Waterjet Tile Collection offers a fresh perspective on design, blending iconic and timeless elements. This collection showcases a series of tiles characterized by their curvaceous forms. The designs are reminiscent of a dance, with each piece flowing harmoniously into the next. Comprising of three distinct shapes, each tile can stand alone as a statement piece or interlock with one another. This results in an organic pattern that ripples across walls and floors, evoking the gentle ebb and flow of nature.

Drawing inspiration from the natural world, **collection designer Denes Petoe** captures the essence of movement and fluidity through stone. The advanced waterjet cutting technique ensures precision in each tile, resulting in designs that require minimal grout joints.

Sourced from select quarries around the world, the collection features three marble variations: Asian Carrara Ultra Premium, Calacatta Gold, and Blue Celeste. The distinct veining and character of each marble color enhance the tiles' overall aesthetic.

The Acurve Interlocking Waterjet Tile Collection offers a unique approach to those seeking to introduce a sense of fluidity and elegance to their spaces. These tiles are versatile enough to complement both grand foyers and modern bathrooms, adding a touch of artistry to wherever they are placed.
