

CREMA BALKAN LIMESTONE

F

STRIPED CHISEL 12"x24"

SPLITFACE 6"x24"

Just so you know...

The Crema Balkan Limestone Collection brings refined texture and durability to architectural surfaces with its striped chisel and splitface finishes. The warm, neutral tones of the stone highlight its natural character, while the textured profiles add depth and dimension. The striped chisel finish delivers clean linear detailing for structured designs, while the splitface finish offers a more rugged, organic look. Both options are crafted for lasting performance in exterior and interior applications, from feature walls to facades, blending strength with timeless visual appeal.
