We recommend you a 2/3 mm grout joint to simplify the laying and optimize the naturalness of the final result.
In order to favour the ordinary maintenance procedures, it is recommended to carry out an acid wash of the surface after 48 hours from grout filling using an acid agent specific for porcelain stoneware tiles.

Manufacturer reserves the right to change the products presented in this catalogue at any time. Tones of samples are indicative

V0		Very Uniform appearance. Pieces of the same shade value are very uniform and smooth in texture. They can be measured for small color differences and are in compliance with the color uniformity requirements of tables 6-10 (ANSI A137.1-2012)
V1		Uniform Appearance. Differences among pieces from the same production run are minimal.
V2		Slight Variation. Clearly distinguishable texture and/or pattern within similar colors.
V3		Moderate Variation. While the colors and/or textures present on a single piece of tile will be indicative of the colors and/or texture to be expected on the other tiles, the amount of colors and/or texture on each piece may vary significantly. It is recommended that the range be viewed before selection.
V4		Substantial Variation. Random color and/or texture differences from tile to tile, so that one tile may have totally different colors and/or textures from that on other tiles. Thus, the final installation will be unique. It is recommended that the range be viewed before selection.

SUSTAINABLE MIND

MAXIMUM CONCERN FOR THE ENVIRONMENT

FROM OUR PLANT....

brand new production facilities

WE
CARE

The in the USA are built in compliance with the most stringent standards in term of environmental protection, safety of workers and reduction of energy consumption.

YOU
CARE

TO YOUR PROJECT.

By choosing this product, the end user will be sure to purchase **durable, safe and green floor and wall tiles**: being extremely durable, they do not call for any chemical treatment, varnish or special detergent. They do not release dust or other substances, even when subject to high pedestrian traffic.

	Freeze thaw	ASTM C-1026	No damages	In accordance
	Chemical resistance	ASTM C-650	As reported	Unaffected
	MOHS hardness			6
	Dynamic Coefficient of Friction		0,42	In accordance

Average values referred to the last two years of production and related to the matte finish of the product.

Values relate to the matte finish of the product and to tests carried out by certified external laboratories, whose results are available upon request.

Be sure to use the same caliber tiles. Color reproductions may vary from actual products.

* Due to the intrinsic nature of porcelain stoneware tiles, please note that the coefficient of friction may vary within the same production lot or from one production lot to the other.

Facings products can become slippery when wet. We recommend to always keep the surface dry.
