We recommend you a 2/3 mm grout joint to simplify the laying and optimize the naturalness of the final result. In order to favor the ordinary maintenance procedures, it is recommended to carry out an acid wash of the surface after 48 hours from grout filling using an acid agent specific for porcelain stoneware tiles.

No claims for visible defects of the material will be accepted after installation or attempted installation.

Manufacturer reserves the right to change the products presented in this catalogue at any time.

Tones of samples are indicative

V0  Very Uniform appearance. Pieces of the same shade value are very uniform and smooth in texture. They can be measured for small color differences and are in compliance with the color uniformity requirements of tables 6-10 (ANSI A137.1-2012)

V1  Uniform Appearance. Differences among pieces from the same production run are minimal.

V2  Slight Variation. Clearly distinguishable texture and/or pattern within similar colors.

V3  Moderate Variation. While the colors and/or textures present on a single piece of tile will be indicative of the colors and/or texture to be expected on the other tiles, the amount of colors and/or texture on each piece may vary significantly. It is recommended that the range be viewed before selection.

V4  Substantial Variation. Random color and/or texture differences from tile to tile, so that one tile may have totally different colors and/or textures from that on other tiles. Thus, the final installation will be unique. It is recommended that the range be viewed before selection.

Average values referred to the last two years of production and related to the matte finish of the product.  
Values relate to the matte finish of the product and to tests carried out by certified external laboratories, whose results are available upon request.  
Be sure to use the same caliber tiles. Color reproductions may vary from actual products.  
\* Due to the intrinsic nature of porcelain stoneware tiles, please note that the coefficient of friction may vary from one production lot to an other.  
Facings products can become slippery when wet.  
We recommend to always keep the surface dry.
