APPLICATIONS

- Interior walls and floors (light to medium duty)*
- Shower walls (steam not recommended)**
- Fireplace surrounds and cooktop areas
- Countertops (light-use)

**Extra care should be taken with Limestones in any wet areas due to their high porosity. See special notes in tech info.

NOTES

Gray Flannel, Zash and Tessuto have a warm gray background with distinctive dark patches and the occasional white quartz veining, giving this stone depth and drama. They are not recommended for any horizontal surfaces where water can accumulate. These stones have a high salt content, which can lead to efflorescence.
