Cool down with hot lava inspired pool tile

Durable fused glass tiles feature an iridescent, undulating surface that plays with light in the water.

A paradoxically cool glass tile line, Lava Glass mosaics incorporate iridescent and undulating surfaces that play with light in water. The shimmering, wetscapes look is sensual and inviting, ideal for pools, showers, and other water and water-adjacent applications. The fused glass tile features durable back paint applied at over 1,025 degrees Fahrenheit, giving the tiles a brilliant, pearlescent color spanning the light and dark tones of each across a single mosaic.

1"x 2" Offset - Windward Bay - Mixed

1"x 1" Straight Set - Burning Ice - Mixed

1"x 1" Straight Set - Deep Flow - Mixed

1"x 2" Offset & V-Cap Strip - Obsidian Shine - Mixed

PATTERNS:

1" x 1" Straight Set

All dimensions are nominal.

One Tile = 1.2 sf

Thickness: 1/4"

PRODUCT DETAILS

- Lava Glass is a fused glass tile with a durable coating on the back of the tile. The coating consists of two layers, the color layer, and a protective white top layer, which are both fused to the back of the tile at a temperature in excess of 1025° F.
- Lava Glass mosaics and V-Cap Strips are back mounted with an alkali resistant mesh and non-water-soluble glue facilitating successful installation in submerged applications.
- Lava Glass meets or exceeds all industry requirements for use in exterior freeze-thaw environments and submerged applications found in "ANSI A137.2 American National Standard Specifications for Glass Tile."
- Lava Glass can be readily cut on a wet saw with a continuous rim diamond blade designed for cutting glass tile. Do not dry cut glass tile with a power tool.
- Lava Glass does not need to be sealed.
- Lava Glass should be cleaned with a pH neutral tile cleaner or alkaline based cleaner.

Lava Glass has a unique molten texture, creating the illusion of a shimmering surface as it plays with light in water. Lava stands out as an exceptional pool tile. It's the little details that make all the difference in wetscape applications.

Developed by glass tile experts, Lava Glass is highly durable, meeting or exceeding all industry requirements for use in exterior freeze-thaw environments and submerged applications found in ANSI A137.2.
