MESTIZAJE

Introduction / Introducción

MESTIZAJE

Mix of cultures

Mestizaje is our appreciation to the imperfect and the natural. Embracing ancestral “Zellige” art and the antique terracotta charms.

Zellige walls are a tribute to the North African Zellige craftsmanship, treasured from one generation to another.

We propose vibrant translucent colours with 12 blended shades for each one, surface textures and shaped backs for your walls; in combination with **Chateau** floors, inspired in graceful French terracotta, century old beauty of clay in chalky colours, embellished by the passage of time.

Mestizaje breaths new life into each ceramic piece.

Mestizaje es nuestra apreciación de lo imperfecto y lo natural. Abarcando el arte ancestral del Zellige y el encanto de la antigua terracota.

Zellige es un homenaje a la artesanía Zellige del norte de África, atesorada generación tras generación.

Proponemos colores translúcidos vibrantes, con 12 tonos mezclados para cada uno, superficies texturadas y reverso de las piezas de aspecto cincelado; en combinación con los pavimentos Chateau, inspirados en la elegante y grácil terracota francesa, la belleza centenaria de la tierra y sus colores arcillosos embellecidos por el paso del tiempo.

Mestizaje aporta viveza y autenticidad a cada una de sus piezas.

WAREHOUSING

In order to guarantee the characteristics of the finish the product must be kept in its original packaging until the time of fixing. If the product is likely to be stored for a long period of time it should be suitably covered.

TILE FIXING

To ensure the products adhere correctly to the surface, it is essential to use specific adhesive and grouting material. This must also be suitable for the environment they will have to withstand. Fitting with traditional mortars does not ensure good adhesion.

Due to the nature of the material there may be dimensional variations between pieces. Therefore , all types of joints must be planned and carried out correctly: structural, perimeter, expansion and installation joints. Fitting tiles without joints is not advisable from any technical point of view as this may lead to various problems. For an optimal result, we advise to use 2 mm (0.08”) grout for Chateau and 1 mm (0.04”) for Zellige.

MAINTENANCE AND CLEANING

Once the materials have been fitted, it is advisable to remove any remaining adhesive and grouting material by using a commercial descaling product designed especially, diluted with water . The descaling product must not remain in contact with the surface to be cleaned for more than 5 minutes.

As a general guideline, powder dertergents should not be used, not wire wool or abrasive materials. Generally a sponge will be sufficient with warm water and liquid neutral soap. Then rinse with plenty of clean water.

ALMACENAMIENTO

Para garantizar las características de su acabado, el producto debe mantenerse en su embalaje original hasta el momento de la colocación. Si el producto va a permanecer almacenado durante un largo periodo es conveniente hacerlo bajo cubierta.

COLOCACIÓN

Para garantizar una buena adhesión al soporte es necesaria la utilización de materiales de agarre y de rejuntado adecuados al ambiente al que vayan a estar sometidos. La colocación con morteros tradicionales no garantiza una buena adhesión.

Debido a la naturaleza del material pueden existir diferencias dimensionales entre piezas. Por ello deberán planificarse y ejecutarse correctamente todo tipo de juntas: estructurales, perimetrales, de dilatación y de colocación. La colocación sin juntas es desaconsejable desde cualquier punto de vista técnico, pudiendo ser el origen de diversas patologías. Para un resultado óptimo, recomendamos usar 2 mm de junta para Chateau y 1 mm para Zellige.

MANTENIMIENTO Y LIMPIEZA

Finalizada la puesta en obra se recomienda eliminar los restos de materiales de agarre y rejuntado con un desincrustante comercial diseñado expresamente para baldosas cerámicas, rebajado con agua, permaneciendo en contacto con la superficie a limpiar no más de 5 minutos.

Como norma general no deben utilizarse detergentes en polvo ni estropajos metálicos o abrasivos. Generalmente será suficiente con una esponja, agua tibia y un jabón líquido neutro. Posteriormente aclarar con abundante agua limpia.
