The collection

Mystère is an elevated interpretation of the beloved terrazzo look, capturing the essence of antique grandeur and the effervescent spirit of Venice.

Inspired by the city's rich cultural heritage and vibrant artistic scene, the collection draws its muse from the famed Venetian Carnival—celebrated for its colorful costumes, intricate masks, and opulent masquerade balls. Each surface pays homage to these coveted celebrations, where bold speckles and vivid hues come together to create an elegant, striking, and lively expression of Venetian splendor.

The name “Mystère” derives from the French word “mysterious,” perfectly encapsulating the enigmatic and captivating beauty of this collection. Just as the Venetian Carnival is shrouded in mystery and intrigue, this collection invites you to explore its depths and discover the stories it holds.

With a vast array of colorways including White, Linen, Sand, Light Grey, Dark Grey, Green, Brown, and Blue, each terrazzo-inspired surface infuses a festive exuberance into any design space with its wide range of faces and vibrant aggregate embellishments.

Available in two exquisite finishes—Structured, a high grip solution ideal for outdoor use, and Semi-polished, offering a natural sheen—and offered in three versatile dimensions — 12"x24", 24"x24", 24"x48" and a 4"x24" Bullnose option — these made-in-the-USA porcelain surfaces seamlessly blend durability with the timeless elegance of Venetian artistry

Finishes

Semi-polished

The Semi-polished finish features a moderate sheen, allowing it to reflect light in a remarkably soft way. These qualities, combined with an equally smooth tactile feel, lend itself particularly well-suited for residential floor installations and wall applications across a wide range of environments, including commercial and public spaces.

Structured

The Structured finish features a slightly rough surface that enhances the materiality of the surfaces, lending it a realistic feel. It also stands out for its remarkable anti-slip grip and high resistance to wear. Due to these characteristics, it is particularly suitable for settings requiring significant technical performance, such as high-foot-traffic areas and outdoor spaces.
